15 Jun 2013**

- Block 1 - PROGRAM INDICATOR. Type program allowing document to which the submittal applies, for example, IMRL and LAMS. Place an "X" in the appropriate box.
- Block 2 - JULIAN DT. Julian date TR originated. (5N)
- Block 3 - TR SER NO. TR serial number consists of a four digit sequential number. (4N)
- Block 4 - Not Used.
- Block 5 - REPORTING ACTIVITY
- Block 5a - AAI. AMMRL activity identifier code of the activity submitting the report. (6A/N)
- Block 5b - ACTIVITY NAME(Short Title) Noun name of the activity identified in block 5a. (26A/N)
- Block 6 - RECEIVED FROM/TRANSFERRED TO ACTIVITY
- Block 6a - AAI. AMMRL activity identifier code of the activity item being reported is received from or transferred to. (6A/N)
- Block 6b - ACTIVITY NAME(Short Title) Noun name of the activity identified in block 6a. (26 A/N)
- Block 7 - QTY. Quantity of items being reported as a gain/transfer/survey/re-identification by this TR. (4N)
- Block 8 - TYPE TRANSACTION. Indicate reason for TR submittal. Place an "X" in the appropriate box.
- Block 9 - T/C. Transaction code identifying the exact nature of the transaction being reported (see NAVAIRINST 13650.1C (NOTAL) or the appropriate SECA instruction to ensure use of the correct code). (2A)
- Block 10 - TOT O/H. Quantity remaining on hand after the adjustment of the quantity reported in block 7. (4N)
- Block 11 - FSCM. Manufacturers or CAGE code for the item being reported. (5 A/N)
- Block 12 - SER NO. Serial number of the item being reported. (10 A/N)
- Block 13 - PART NUMBER. Part number of the item being reported or old part number of the re-identified item. (32 A/N)
- Block 14 - NSN. National stock number of the item being reported. (22 A/N)
- Block 15 - Not used.
- Block 16 - NOMENCLATURE. Noun name of the item being reported. (40 A)
- Block 17 - TRANSPORTATION CONTROL NO. Transportation control number (TCN) used when item is shipped to rework. (19 A/N)
- Block 18 - ITEM NO. Allowancing document line number of item being reported (IMRL, etc). (4N)
- Block 19 - RWK CNTRL. Rework control number assigned by SERMIS. (5 A/N)
- Block 20 - TEC. Type Equipment Code. (4 A/N)
- Block 21 - QTY AUTH. Authorized allowance of the item being reported (from IMRL). (4 A/N)
- Block 22 - LAST TR NO. Last TR serial number for the item being reported. (5N)
- Block 23 - PRINT DT. Current allowancing document print date (YYMMDD). (6N)
- Block 24 - Not used.
- Block 25 - RE-IDENTIFICATION DATA
- Block 25a - FSCM. Manufacturers code for the item being reidentified. (5 A/N)
- Block 25b - RE-IDENTIFIED PART NUMBER. New part number for the reidentification. (4N)
- Block 25c - TOT O/H. Total quantity on hand of the reidentified P/N after reidentification. (4N)
- Block 26 - SUBCUSTODY
- Block 26a - TYPE. Enter the code (R for reportable item on IMRL, N for nonreportable item on IMRL, or X for item not on IMRL). (1A)
- Block 26b - ISSUE or CORRECTION. Place an "X" in the appropriate box.
- Block 26c - CAL/PM/RWK ACT. Noun name of the activity performing the calibration, PM, or rework. (13 A/N)
- Block 26d - CAL/PM/RWK/DUE. Julian date due at the activity performing calibration, PM, or rework. (4N)
- Block 26e - QTY. Quantity of items subcustodied. (4N)
- Block 27 - ISSUE
- Block 27a - DATE. Julian date of issue. (4N)
- Block 27b - TIME. Military time at which the transaction is complete. (4N)
- Block 27c - ORG. Organization code of the individual identified in block 27f. (3 A/N)
- Block 27d - W/C. Work center of the individual identified in block 27f. (3 A/N)
- Block 27e - STATUS. Status code showing the condition of the item being reported. (2/N)
- Block 27f - RECEIVED BY. Signature and rate of the individual accepting the item being issued.
- Block 28 - RETURN
- Block 28a - DATE. Julian date of return. (4N)
- Block 28b - TIME. Military time at which the transaction is complete. (4N)
- Block 28c - ORG. Organization code of the individual identified in block 28f. (3 A/N)
- Block 28d - W/C. Work center of the individual identified in block 28f. (3 A/N)
- Block 28e - STATUS. Status code showing the condition of the item being reported. (2A/N)
- Block 28f - RECEIVED BY. Signature and rate of the individual accepting the item being reported.
- Block 29 - AUTHORITY/COMMENTS/LOCAL USE. For Authority; Command directive authorizing transaction (SERMIS generated number, reference for letter or memo, DTG of msg, etc). For Comments/Local Use; Comments explaining the transaction or information for use with the VIDS boards. (4 A/N)

**NOTE:** Left characters in paranthesis at the end of the block explanation, for example (4N), (6A/N), indicate the maximum field length and alpha, numeric, or alpha/numeric data entries.

(Sample)**

[CNAF 4790/74](#) (Appendix B, Table B-1, provides additional CNAF fillable forms)

**MOBILE FACILITY  
LOGBOOK AND INVENTORY RECORD**

**GENERAL INSTRUCTIONS**

**1. ORIGIN.** Logbook and Inventory Records shall be initiated by the configuration activity. CNAF 4790/51 shall be initiated and placed in Part I for the MF shell, air conditioner, frequency converter, and generators if shipped with the MF or MF complex.

**2. CUSTODY.** The MF Logbook and Inventory Record shall accompany the MF or be maintained in a central library at all times and shall be continuously maintained and updated. Any classified information shall be safeguarded in accordance with applicable security regulations. When an MF is transferred, the Logbook and Inventory Record shall be transferred with the MF.

**3. MAINTENANCE.** The Logbook and Inventory Record is maintained similar to an Aircraft Logbook and is in loose-leaf form. The full identification data and serial number shall be inserted on each form in the spaces provided to ensure ready identification when pages are removed for entries or any other reason.

The Logbook and Inventory Record is arranged in two parts:

CNAF 4790/51 is filed in Part I and must be maintained for the MF shell, running gear, air conditioner, frequency converter, and generator. The Logbook and Inventory Record shall be kept neat and clean; all necessary entries shall be made under the supervision of the cognizant Maintenance Officer. Entries shall be printed in ink or typewritten, except where penciled entries are authorized.

CNAF 4790/74A and CNAF 4790/75A are filed in Part II.

CNAF 4790/74A provides a record of equipment installed or in-use and provides an inventory record for inventory reports.

CNAF 4790/75A provides a record of shortages authorized by the appropriate ACC/TYCOM/COMMARFORCOM/COMMARFORPAC upon transfer or receipt of a MF.

The depot level maintenance activity shall, upon induction of the MF, screen the entire Logbook and Inventory Record for information pertinent to rework or rehabilitation and shall purge all entries not required as a permanent record.

**4. DISPOSITION.** The Logbook and Inventory Record for MFs stricken from the NAVY/MARINE CORPS list shall be disposed of in accordance with the following procedures:

a. DESTROYED MFs - The Logbook and Inventory Record shall be disposed of locally after necessary investigation and preparation of required reports.

b. Logs and records of MFs and/or equipment which have been involved in an accident(s) resulting in death and/or injury to any person; and/or substantial damage to other than Government property, shall be retained for a period of one year by the operating activity (for defense litigation action) and then forwarded to the Director, Washington National Records Center, General Services Administration, Washington, D. C. 20409.

**5. SIGNATURES.** All signatures required in the MF Logbook and Inventory Record and associated forms and records shall be the personal signature of the person designated by cognizant Commanding Officers for this purpose. All signatures shall be written. Rubber stamp signatures are not authorized. This requirement is waived when a new MF Logbook and Inventory Record is initiated or when old MF Logbooks and Inventory Records are consolidated.

**MOBILE FACILITY  
INVENTORY RECORDS**

**INSTRUCTIONS**

PART II  
INVENTORY

**1. INVENTORY RESPONSIBILITY.** The transferring activity is responsible for a complete inventory of the Mobile Facility and for reporting shortages to the accepting activity. To maintain a continuous chain of custodial responsibility, the MF Inventory Record is used as the instrument of transfer. MF's are transferred or accepted only with an Inventory Record. There may be exceptions to this requirement, such as MFs procured for research and development only. Inventories for the MFs at the time of transfer are completed to the mutual satisfaction of both the transferring and accepting activities. In all other instances when an MF is transferred, an inventory of the MF is accomplished based on the items of equipment and material listed in the applicable log or record.

**2. SHORTAGES.** The transferring activity makes every effort to locate missing items or withdraw from stock the replacement items necessary to complete the inventory. If the transferring activity is unable to locate or supply missing items, the notation "Missing items not available" is entered in the Inventory Record of Shortages. An explanatory statement signed by the transferring activities designated representative is added to this form to indicate authority for shortages. Authorization for such shortages is obtained from the cognizant controlling custodian prior to transfer of the MF. On the basis of the authorized shortages statement, the accepting activity fills shortages by requisitioning required items through normal supply channels.

**3. SECURITY CLASSIFICATION.** It is desired that the MF Inventory Records be unclassified. However, when classified equipment is installed in the MF and listed in the record, the Security Classification, SECRET, or CONFIDENTIAL, is indicated in capital letters immediately following the identifying nomenclature or title. In addition, an asterisk (\*) with a footnote, nomenclature and title unclassified will be indicated if applicable.

The listing of the classification involved does not normally require classifying the MF Inventory Record. In lieu of this, when the nomenclature or title is classified or the installation of the classified or unclassified equipment is of a SECRET or CONFIDENTIAL nature, the equipment is not listed in the record with other equipment. Such listing is entered on a separate supplemental page with a notation on the Inventory Record and Equipment List Form. To prevent possible security violations, no attempt is made to define the location of the equipment referenced on the Inventory Record and Equipment List Form. If circumstances are encountered that would cause the classified supplemental pages to not be used, the basic record is given a classification commensurate with the highest classification of equipment installed in the MF. Handling of the classified supplemental pages and/or the basic record when classified is per current classification guides.

**4. INVENTORY ITEMS.** The following governs the determination of items to be listed in the MF Inventory Record without regard to whether they are contractor or Government furnished:

a. Items of equipment that are rigidly fixed and considered to be a basic integral part of the MF, such as air conditioners, test panels, test benches, and power rectifiers.

b. Special equipment items essential to the safety of personnel, such as fire extinguishers, fire axes, and battle lanterns.

c. Loose equipment delivered with the MF, such as jacks, butting kits, stairways, lifting slings, power cables, walkways, publications, and wiring diagrams.

d. Items subject to pilferage or readily convertible to personal use, such as typewriters, clocks, intercoms, test equipment, desk lights, and vacuum cleaners.

MOBILE FACILITY  
INVENTORY RECORDS

SHORTAGES

- NOTES:**
1. If transferring activity is unable to locate or supply missing items, the notation, "Missing items not available" is entered in the Inventory Record of Shortages.
  2. An explanatory statement signed by the transferring activity's designated representative is added to this form to indicate authority for shortages.
  3. Receiving activity fills shortages through normal supply channels.
